Verification and Tagging Policy

Ads may be tagged solely for the purpose of collecting data geared toward measuring performance of a campaign (e.g., ROI, attribution, impact, and verification), in each case, as approved by NCM. No browser-based cookies, Flash cookies, web beacons, pixels, tags, or any other technology designed to track end-users' activity for any purpose (including, without limitation, to target or retarget ads) on any NCM branded, owned, licensed, affiliated or controlled website, application, or other online product without prior NCM written consent.

NCM must be notified of all data being collected in connection with a campaign by an advertiser, agency and/or third-party vendors acting on their behalf for the purpose of verifying that such data collection activity is acceptable to NCM. All data collected in connection with a campaign (including, without limitation, personally identifiable information) must be approved by NCM in writing prior to the campaign start date.

Any campaign intended to capture information for the purpose of serving ads to, or otherwise targeting or actively engaging with, NCM users outside of NCM platforms or offerings, is prohibited (e.g., no database, network, or exchange may be built and/or exploited as "NCM Movie Audience or Users").

Data collected may not be sold or otherwise transferred to any third party for such third party's commercial use.

Data collected must be made available for review by NCM at NCM's request.

Advertisers, agencies, and third-party vendors acting on their behalf must comply with the Behavioral Advertising Self-Regulatory Principles, which may be found at the following URL: <https://www.iab.com/wp-content/uploads/2015/05/ven-principles-07-01-09.pdf>.

NCM reserves the right to disapprove use of any advertiser's or agency's third-party vendor.

Malware

Malware delivered via advertising creatives degrades the advertising ecosystem, undermines Rocket Fuel's relationship with supply partners, harms consumers, and negatively affects Rocket Fuel's brand. Additionally, malware-infected machines may be used to generate money for fraudsters. Rocket Fuel does not allow ad creatives that are infected with malware or can be used as a distribution vector for malware. Ads that misrepresent themselves or ads that click through to landing pages that are infected with malware are not allowed.

Ads and accounts that violate this policy will be suspended.
