

Before you begin...

Visit the NCM AdSpecs website: <http://adspecs.ncm.com>, then select the links under the “National” section.

- Review the **NCM Spec Sheets** and test your file via the **NCM Spec Check Utility** in order to verify that your ad meets NCM Specifications.

Recommendations for Success:

- Disable your Firewall(s).** You may need to contact your IT dept.
- Test your upload speed** via www.SpeedTest.net or similar site. (An upload speed of > 5Mbps is recommended).
- Upload your file(s) one or two business-days prior to your deadline.** *The delivery deadline day is the BUSIEST day for uploads which will result in longer upload times. NCM is not responsible for long upload times.*
- Follow the DigiDelivery Instructions EXACTLY** (see page 2)
- Refer to the Troubleshooting page** if you experience problems. (see page 3)

IDEAL specs for DigiDelivery

2.5 GB	3hr 48min	55 min	34 min	7.5 min	3.5 min
5 GB	7hr 35min	1hr 48min	1hr 8min	15 min	7 min

Installation & Upload Instructions: see page 2
Troubleshooting: see page 3

Download & Install the DigiDelivery Client software:

- Visit: <http://www.asperasoft.com/downloads/digi-client> and select the proper Operating System option.
- Select the “**Direct Download**” link, then “**Run**” and follow the remaining DigiDelivery setup instructions.

Upload your file:

1. Launch the DigiDelivery software and click the “**New Delivery**” button...

2. Choose your file to upload:
 - a. Enter the “**Name**” of your ad...
 - b. Click the “**Add File or Folder**” button...
 - c. Select your file and click the “**Choose**” button...
 - d. Click the “**Next**” button.

3. Enter Server Account information (information is case-sensitive)
 - a. Host: **digidelivery.ncm.com**
 - b. Username: **National**
 - c. Password: **National**
 - d. Click the “**Next**” button.

4. Add Recipients
 - a. Click on the “**Accounts**” button, and select “**Digital Delivery**”
 - b. Click the “**Next**” button.

IMPORTANT: DO NOT uncheck the box next to “**Include Encryption Key in Email**”!!!

5. Enter your **Slate Information** in the “**Message**” area

6. Click the “**Send**” button. *You will be alerted when the delivery is complete and sent successfully.*

Troubleshooting: see page 3

1. Is DigiDelivery the best solution for you?

MAYBE.... To effectively upload a file via DigiDelivery, you must have:

- Installed the DigiDelivery “Client” software
- NCM DigiDelivery instructions
- NCM Spec Sheet for Externally Produced Ads
- A high-speed internet connection. (An upload speed of > 5Mbps is recommended).
- Ability for a sender to disable firewall(s) on their system/network. You may need to contact your IT dept.

2. Missing information which adversely affects a DigiDelivery upload:

- Be sure your **Host Name, Username & Password** match the DigiDelivery instructions EXACTLY.
- **DO NOT** un-check the “**Include Encryption Key in Email**” as noted on “Step 4” or NCM will not be able to retrieve your file(s) once delivered.

3. If your upload has “Timed-Out” or is taking a VERY long time to upload:

There are a variety of factors that may contribute to upload problems but often have to do with your upload speed or active firewalls. Follow these steps:

1. STOP the DigiDelivery process.
2. Test your upload speed via www.speedtest.net or similar site.
 - **If your upload speed is > 5Mbps:** Make sure your firewalls are disabled then try to upload your file again.
 - **If your upload speed is < 5Mbps:** Your upload may take a long time... NCM recommends shipping your ad.
3. If you attempt several file uploads with no improvement, other issues may be causing your upload to fail or “time-out”. **SHIP your ad to NCM.** (See *shipping info below*).

4. Can I deliver my ad via FTP Site?

NO. FTP Sites or links to download a file via FTP sites are NOT supported delivery solutions.

5. Can I ship my ad instead?

YES. You may ship your media via **NEXT DAY AIR** to:

National Cinemedia
ATTN: Christine Alducin, National Accounts
9110 East Nichols Avenue, Suite 200
Centennial, CO 80112-3405

**Be sure to CLEARLY label your media with your slate Information.*
